

Homes with solar panels for sale near me

Overview

Should you buy a solar home if you're not the original owner?

Solar will save almost all homeowners money, even if you're not the original owner. You might encounter one of four solar home scenarios when you're shopping for a house: fully-owned solar panels, leased solar panels, solar panels purchased with a solar loan, and PACE (Property Assessed Clean Energy) financed solar panels.

Should you buy a home with solar panels?

The ideal situation when you're looking at properties with solar is for the panels to be owned by the current homeowner. Panels purchased upfront are owned entirely by the seller, meaning they don't come with any strings attached (aside from potentially paying a little more due to the increased home value that comes with solar).

Should you buy a solar-equipped home?

Home solar is more popular than ever, and if you're in the market for a new home, you might come across options with solar panels already installed. It's important to understand the unique aspects of buying a solar-equipped home so you can enjoy the benefits of solar energy without going through the installation process.

How much do solar panels cost?

A DOE-funded study at the Lawrence Berkeley National Laboratory found that solar panels are viewed as upgrades, just like a renovated kitchen or a finished basement, and home buyers across the country have been willing to pay a premium of about \$15,000 for a home with an average-sized solar array.

Does Home Depot install solar?

During your free in-home consultation, The Home Depot's local solar power

installer will clearly explain the installation process and how easy it is for you to go solar. By powering your home with clean, renewable solar energy, you're creating a healthier environment and conserving natural resources.

Why should you buy a solar-powered home?

How exciting! Owning a solar-powered home can help you save on your energy bills, reduce greenhouse gas emissions, and be more energy independent. And thanks in part to investments from the Solar Energy Technologies Office, the cost of solar energy is coming down every year.
