House with solar panels

Overview

Should I get solar panels for my home?

Today, going solar is a routine home improvement project that comes with the benefits of energy cost savings, reduced emissions, and increased home value. In this article, we'll cover everything you should know about getting solar panels for your home so you can make informed decisions as you navigate the process. Topics in this article::

Is buying a home with solar panels the right move?

Currently, solar power accounts for just 3.9 percent of total U.S. electricity generation, but that number is rapidly growing. So is buying a home with solar panels the right move for you?

Well, that depends on some key factors.

Should you buy a solar home if you're not the original owner?

Solar will save almost all homeowners money, even if you're not the original owner. You might encounter one of four solar home scenarios when you're shopping for a house: fully-owned solar panels, leased solar panels, solar panels purchased with a solar loan, and PACE (Property Assessed Clean Energy) financed solar panels.

What are the different types of solar home scenarios?

You might encounter one of four solar home scenarios when you're shopping for a house: fully-owned solar panels, leased solar panels, solar panels purchased with a solar loan, and PACE (Property Assessed Clean Energy) financed solar panels. Here's what you should know about each scenario.

Why should I get solar panels for my home?

There are a handful of reasons to get solar panels for your home, but the biggest one is energy cost savings. Home solar is simply much cheaper than

paying for grid electricity, and can lead to tens – sometimes hundreds – of thousands in savings over the warranty period of the panels.

Will solar panels power my home at night?

But snow can be easily cleaned off or will melt quickly. Will my solar panels power my home at night?

No, your solar panels won't power your home at night. However, most home solar panel systems are sized to generate enough electricity during the day to cover the costs of nighttime energy usage under net metering.
