

How much does residential solar cost

Overview

How much do commercial solar panels cost?

Generally, installing solar panels on businesses costs a bit less per watt because the systems are larger, but the total costs will be higher. In 2025, the average cost for commercial solar panels is just about \$2.00 per watt. There is a lot to consider when figuring out how much you'll spend on a solar installation.

How much does a home solar system cost?

According to studies by the U.S. Department of Energy, the all-in cost of a home solar panel system is between \$2.74 to \$3.30 per watt. ^{1,2,12} This figure includes the solar panels, the installation, and other expenses. Using these numbers, an average-sized 8-kilowatt residential solar system would cost between \$21,900 – \$26,400.

How much does a solar panel installation cost?

Solar panel installation costs vary by the installation company and project scope, making it challenging to pinpoint exactly how much you'll pay to have a pro install your solar panels. However, the U.S. Department of Energy estimates that installers add around \$2.25 per watt to the cost of a solar panel installation.

How much does it cost to clean solar panels?

Solar panels require very little upkeep. If you're able to clean the solar panels yourself, the only maintenance cost will be the water used to hose them down. If you hire a professional to clean your solar panels, it will cost around \$100 to \$350, on average.

How much does a 12 kW solar panel cost?

The average cost of a 12 kW solar panel installation on EnergySage is \$20,754 after the federal tax credit. You'll probably save anywhere from

\$34,000-\$120,000 over 25 years by going solar. Solar panels are just 12% of the total cost of a solar panel installation.

How much do solar panels cost per kWh?

This typically ranges from 6-8 cents per kWh, compared to current grid electricity averaging 16.44 cents per kWh nationally. Most homes need between 7-12 kilowatts (kW) of solar capacity to offset their electricity usage. A typical American household consuming 10,632 kWh annually requires approximately 8-9 kW of solar panels.

How much does residential solar cost

Solar Panel Costs in 2025

Average System Cost The average cost of a residential solar panel system ranges from \$18,000 to \$43,000, depending on the system size, location, and available incentives. Typically, a 6-8 kW system--suitable for an average ...
