How to clean solar panel

Overview

How to clean solar panels?

The best way to clean solar panels starts with a gentle brushing. Otherwise, if a lot of material is sitting on solar panels, immediately mixing the debris with water might cause spread and smear. Brushing breaks down and removes some material, making the next steps in the cleaning process more effective.

Do solar panels need cleaning?

There are some instances where solar panels might need cleaning, but most of the evidence says solar panels are self-sufficient and low-maintenance. We'll get to the best way to clean your solar panels in a minute.

How much does solar panel cleaning cost?

A professional solar panel cleaning company may not necessarily do a significantly better job than you can, but they're likely better equipped to clean and maintain rooftop units safely and already have all of the necessary equipment. Plus, professional solar panel cleaning will usually only cost you around \$150-\$300, or \$15-\$30 per panel.

How do you clean a solar panel if it rains?

Leaves, bird droppings, and dust accumulate on solar panels. Even though rain clears some of this, it doesn't get everything and can create dirty residue when puddles evaporate. Debris can be removed with gentle brushing from a soft-bristled tool to start the cleaning process.

What should I do if my solar panels get dirty?

Shut off your solar panel system – this ensures your safety and that your equipment won't get damaged. Use a soft brush to clean the surface of your dirty solar panels to remove debris like dirt and dust. Never use a rough or coarse brush as it could damage your panels.

Should you clean solar panels with cold water?

Consider the weather and your personal safety as well. For example, if it's extremely hot outside, cleaning solar panels with cold water could actually damage them, or if it's slick or wet outside, you could hurt yourself in the process.
