Today, going solar is a routine home improvement project that comes with the benefits of energy cost savings, reduced emissions, and increased home value. In this article, we'll cover everything you should know about getting solar panels for your home so you can make informed decisions as you navigate the process. Topics in this article:.

Are solar panels a good investment?

Solar panel installation costs have dropped significantly in the past decade. Solar energy systems can make new homes cost more and increase a home's selling price. The expense of installing solar panels can show returns in 5-10 years with lower power bills, depending on the home's location and energy needs.

How do I install solar panels?

Ground-mounted panels can be installed anywhere with good sun exposure and enough open space. A minimum of 350 square feet is usually required. Installing solar panels requires the following steps: Plan the solar energy system based on the home's size, location and energy needs. Measure, cut and assemble the support structure for the solar array.

Why should I get solar panels for my home?

There are a handful of reasons to get solar panels for your home, but the biggest one is energy cost savings. Home solar is simply much cheaper than paying for grid electricity, and can lead to tens – sometimes hundreds – of thousands in savings over the warranty period of the panels.

How do I go solar?

Here's our quick guide to going solar. First, determine if you're a good fit based on your energy costs, home and roof setup, and location. Compare

multiple quotes when going solar to find the right system at a competitive price.

How do I get solar power?

Here are the steps to take to get powered by sunshine. Choose a solar installer. An installer can help you determine if your roof is suitable for solar panels.
