# **How to install a solar system step by step**

## Overview

---

How to install solar panels?

The first step in solar panel installation is fixing the mounting structure to support the panels. The whole mounting structure must be tilted and have an angle between 15 to 20 degrees to have maximum sunlight exposure. For countries in the Northern Hemisphere, the best direction to face solar panels is south because it gets maximum sunlight.

What are the steps in a residential solar installation process?

1. Initial Assessment and Site Evaluation The first stage in the residential solar installation process involves evaluating the solar potential of your property. This assessment covers: These details help determine how many solar panels for home you'll need and what energy output to expect.

How do I choose a solar system for my home?

The first stage in the residential solar installation process involves evaluating the solar potential of your property. This assessment covers: These details help determine how many solar panels for home you'll need and what energy output to expect. 2.
