

How to install solar power for home pdf

Overview

How do I install a solar power system?

Determine the location of the electrical roof penetration and wire run, if wiring is planned for this area. CHECKING THE SOLAR POWER SYSTEM INSTALLATION LOCATION Determine the wind loads for the installation site. Check with your local building and safety department for the specific requirements.

How do I choose a solar power system installation site?

CHECKING THE SOLAR POWER SYSTEM INSTALLATION LOCATION Determine the wind loads for the installation site. Check with your local building and safety department for the specific requirements. Make certain that the roof structure can support the live and dead loads resulting from the installation of the PV array.

How do I design a solar energy system?

No matter what your solar energy system is for, there are seven steps in the design of every successful solar electric installation:

- Scope the project
- Calculate the amount of energy you need
- Calculate the amount of solar energy available
- Survey your site
- Size up the solar electric system.

How do you install solar panels on a roof?

Others are designed to have the solar panels mounted to the fixing kits before being mounted to the roof. With a pole-mounted system, you typically erect your pole first and then fit the solar panels once the pole is in position. A ground-based mounting system is the easiest to install, as there is no heavy lifting.

Should you install a solar electric emergency power system?

For smaller systems, a solar electric emergency power system can be cost-competitive with installing an emergency power generator and uninterruptable power supplies. A solar electric emergency power system also

has the benefit of providing power all of the time, thereby reducing ongoing electricity bills as well as providing power backup.

How can I use solar electricity?

The book includes a number of example projects to show how you can use solar electricity. Some of these are very straightforward, such as providing electrical light for a shed or garage, for example, or fitting a solar panel to the roof of a caravan or boat. Others are more complicated, such as installing photovoltaic solar panels to a house.
