

How to purchase solar panels for home

Overview

Can you buy solar panels yourself?

While it is possible for homeowners to buy solar panels themselves, either used or directly from the manufacturer, there are a few reasons to buy them through an installer. Design a custom solar system and compare quotes online. The back way into buying solar panels is buying a house that already has solar panels installed.

Should I get solar panels for my home?

Today, going solar is a routine home improvement project that comes with the benefits of energy cost savings, reduced emissions, and increased home value. In this article, we'll cover everything you should know about getting solar panels for your home so you can make informed decisions as you navigate the process. Topics in this article:.

How do I buy solar panels?

How you choose to buy solar panels depends on your financial situation and your savings goals. Paying cash is the simplest way to buy solar panels and offers the greatest return on investment. Cash purchases are typically made in 3-4 installments. For example:.

Can you buy a solar energy system with a mortgage?

New homeowners can add solar as part of their mortgage with loans available through the Federal Housing Administration, which allow borrowers to include financing for home improvements in the home's purchase price. Buying a solar energy system makes you eligible for the Solar Investment Tax Credit, or ITC.

Should you buy or buy a solar system?

Consumers have different financial options to select from when deciding to go solar. In general, a purchased solar system can be installed at a lower total

cost than system installed using a solar loan, lease, or power purchase agreement (PPA). If you prefer to buy your solar energy system, solar loans can lower the up-front costs of the system.

Where can I buy solar equipment?

Like wholesale resellers, Amazon is another way to purchase solar equipment directly. Many people commonly purchase solar panel kits from Amazon that include the majority of equipment necessary for getting a solar panel system up and running (i.e., wiring, solar panels, the inverter, etc.).
