SolarReviews has both an extensive collection of unbiased consumer reviews of U.S. solar companies and an expert ranking system to help you identify the best solar panel installation companies in your area. Since 2013, our in-house solar experts and engineers have built one of the most accurate.

If you're sick of not knowing how much you're going to have to spend on your electricity bill each month and you live in a house or have access to some land, fitting solar panels can be a good way to cut your spending. The price of panels has dropped in recent years, just as electricity prices have.

Owning a solar-powered home can help you save on your energy bills, reduce greenhouse gas emissions, and be more energy independent. And thanks in part to investments from the Solar Energy Technologies Office, the cost of solar energy is coming down every year. Like any water heater, refrigerator. Why should you buy a solar-powered home?

How exciting! Owning a solar-powered home can help you save on your energy bills, reduce greenhouse gas emissions, and be more energy independent. And thanks in part to investments from the Solar Energy Technologies Office, the cost of solar energy is coming down every year.

Are solar panels a good investment?

For one, the solar panels, racks, and inverters on your roof aren't yours, and the solar company that owns them—not you—benefits from all the available tax incentives. Interest rates can be higher than for financing you obtain yourself. Your monthly payment also can rise each year with a lease, versus a loan payment that stays constant.

Are solar panels the future?

Solar panels play an important part in shaping the homes of the future. Our experts look at how these future homes will dramatically cut your energy bills and carbon footprint. Sign up to Energywire, our monthly newsletter full of news, advice and tips on energy saving and renewable energy options. Sign up.

Do I need more solar panels?

If you want more power, you will need more panels. Ideally, some or all of the roof in question will be south-facing and free from shade. You can use this handy calculator provided by the Energy Saving Trust to give you an indication of how much you could save. Then, you need to get some quotes from reputable fitters.

Are solar panels a good idea?

If you're sick of not knowing how much you're going to have to spend on your electricity bill each month and you live in a house or have access to some land, fitting solar panels can be a good way to cut your spending. The price of panels has dropped in recent years, just as electricity prices have shot up.

Should you buy a solar PV system for your home?

Well-chosen solar panels can provide a reliable source of renewable electricity for decades, helping to slash your electricity bills and cut your carbon footprint. But buying an inappropriate solar PV system for your home could leave you out of pocket.
