The best rooftop solar panels have high efficiency ratings and great warranties. Take a look at CNET's expert picks for the best home solar panels. The companies providing quotes may differ from those described in our independent reviews. Deals are selected by the CNET Group commerce team, and may. How do I choose the best solar installer?

A quality solar installer will typically install quality solar panels, so your main focus should be choosing the best solar installer for the job—your installer's experience and your solar system's size have a bigger impact on effectiveness. Still, every home is different, and most will benefit from having the most efficient panels on the market.

How do I choose the best solar panels for my home?

To help calculate the best solar panels for homes, the Forbes Home editorial team analyzed 19 solar companies, with each company's star rating determined by evaluating a variety of metrics, including years in business, panel variety offered, the results of our NPS survey and more.

How do I choose the best solar panel brand?

The ConsumerAffairs Research Team conducted an unbiased evaluation of top solar panel brands on the market. To pick the best, we looked for high efficiency ratings, comprehensive warranties and good customer reviews.

How do I install solar panels?

Ground-mounted panels can be installed anywhere with good sun exposure and enough open space. A minimum of 350 square feet is usually required. Installing solar panels requires the following steps: Plan the solar energy system based on the home's size, location and energy needs. Measure, cut and assemble the support structure for the solar array.

Do you need more solar panels for your home?

The larger the home, the more solar panels needed. When adding solar panels to an existing home, you can determine the customer's monthly energy consumption based on their power bills. For the most accurate estimate, divide the annual usage by 12 for the average monthly energy usage.

Should I install a solar panel on my roof?

If your roof is small and you don't have a lot of space for your system,

investing in the most efficient, highest-performing panels can get you the performance you need. If you have enough room for a larger system, installing slightly less efficient panels could provide ample output at a competitive price.
