

Installers of solar panels certification

Overview

What certifications do solar installers need?

The leading certifications for solar installers are through the North American Board of Certified Energy Practitioners (NABCEP). This organization offers a variety of certifications for solar system installers, technical sales professionals, design specialists, and PV system inspectors.

What does it mean to be a certified solar installer?

Certification means a person has taken at least 58 hours of training in accredited training classes, achieved a very high level of professional solar experience in the field as a PV professional by performing at least 3 PV installations, has at a minimum a ten-hour OSHA card, and has passed the NABCEP Certification Exam.

How do I become a NABCEP certified solar installer?

To become NABCEP certified, follow these essential steps. First, meet the eligibility requirements, which include a combination of education and work experience in solar PV installation. Next, complete a NABCEP-approved training program that covers essential topics such as system design, installation, and maintenance.

How do I verify a solar installer's certification?

To verify a solar installer's certification, you can consult the certifying organization responsible for their solar installer certification. Most reputable solar certification programs maintain public directories or databases on their websites where you can search for certified professionals by name or location.

How do I become a certified solar installer?

To become a certified solar installer, the first step is to research the specific solar licensing requirements in your state. Typically, an electrical license is

required, but regulations can vary widely by state and locality.

Does Sei offer a solar certification?

Solar Energy International (SEI) also offers a certificate for residential and commercial photovoltaic (PV) systems. This guide provides an overview of the different solar certification programs available, and how to become a certified solar installer.
