Navigate our curated collection of solar installer reviews and discover vetted solar professionals in your area. Gain insights from real customers, compare

installer performance, and make confident decisions for your solar journey. Our comprehensive database features over 2500 locations nationwide. How do I choose a solar installation company?

Research solar installation companies and get multiple quotes: This process can help you get a sense for each company's options and reputation and general expectations for how much power a solar installation can produce on your home. We suggest vetting at least three solar companies, depending on the availability in your area.

Why should I choose a local solar installer?

SolarReviews data, from tens of thousands of reviews of solar companies, shows that local, family-owned solar companies record far higher levels of client satisfaction. This is why we recommend going with a company that's local to your area rather than a nationwide installer. How can I find solar installers near me?

.

How much do solar panels cost?

On average, solar panels cost around \$23,000 for an average, 8 kW solar system, without any incentives. However, the price you'll pay will depend on many factors, most largely the size of your system. Solar systems cost \$2.62 to \$3.23 per watt, so it's wise to estimate how large of a system you'd need to get the closest solar panel cost estimate.

How do I meet with a solar installer?

When you meet with a solar installer, a representative should walk you through the company's specific design and installation process, but below, we'll give you a high-level overview of how solar installation typically works.

Can solar panels be installed on a roof?

The suitability of solar panels on your roof depends on several key factors. South-facing roofs maximize sunlight, while east or west-facing roofs can still work but produce slightly less energy. Roof slopes between 15 and 40 degrees are ideal for performance.

How much does a home solar system cost?

The average cost of a home solar system in the U.S. is around \$16,129 or \$14 per panel, based on responses to our 2025 survey of solar customers nationwide. Solar incentives such as the 30% federal tax credit, state tax credits, and local rebate programs can help reduce the cost of a home solar system.
