

Installing a solar system on a home cost

Overview

How much does solar panel installation cost?

On the high end, solar panel installation can cost over \$40,000. On the low end, it only costs a few thousand. It all depends. Additionally, none of these prices account for incentives like the federal investment tax credit (ITC), which can make your solar system up to 30% more affordable.

Should you install solar panels yourself?

When you install solar yourself, you don't have to pay labor costs, customer acquisition costs, or installer profit margins. However, installing solar panels is dangerous, and taking the DIY route can void your warranties and even prevent you from connecting to the grid. How much do solar panels cost if I buy used solar panels?

.

How much does a commercial solar system cost?

Commercial solar installations are a great way for companies to lower energy costs. Generally, installing solar panels on businesses costs a bit less per watt because the systems are larger, but the total costs will be higher. In 2025, the average cost for commercial solar panels is just about \$2.00 per watt.

How much does a crystal solar panel cost?

These panels use whole crystals rather than fragments and are a solid black color, so they blend in well with most homes. These high-quality panels are long-lasting and are often warrantied for 20-25 years. Expect to pay \$1.25 - \$2.00 per watt of production for the panels. These blue crystal panels are less efficient than the monocrystalline.

How much does home solar cost?

The average pre-incentive cost of home solar is \$29,161 for a three-bedroom

house, or \$20,412 after claiming the 30% tax credit. However, as shown in the chart below, the number of bedrooms isn't a great indicator of the size and cost of a solar system – and neither is living space, for that matter.

How much does a new solar system cost?

The amount that you'll pay for a new solar power installation varies based on the size of the system, which depends on the desired goal. Although the national average spent on solar power is around \$18,000 before incentives and rebates, and most pay between \$15,000 and \$25,000 for a 6kW system.
