

Installing solar panels in backyard

Overview

Learn the benefits, challenges and tips of installing solar panels in your backyard, from planning to maintenance. Compare different types, brands and models of solar panels and trackers for your backyard system.

Can I install solar panels in my backyard?

In some cases, you can install solar panels in your backyard without seeking permission. In other situations, you must contact multiple organizations, councils, and regulatory boards before installing a single solar panel.

Where should solar panels be installed?

You won't have to do any calculations or worry about finding true south yourself – a solar installer will find the precise direction to point your panels in accordance with your property. The roof is the best place for solar panels because it receives the most uninterrupted sunlight throughout the day.

Can I install solar panels on the front of my home?

In some cases, heritage neighborhoods may restrict homeowners from installing solar panels on the front of their homes (i.e. the side facing the street).

How do I get solar panels installed?

To get solar panels installed, contact a local solar panel installation company and request a free estimate. These companies have experience installing solar panels in your area and are familiar with the local laws. They may have even installed solar panels on neighboring properties in your condo complex or HOA before.

Can I install a single solar panel?

In some situations, you can't install a single solar panel without first contacting the necessary organizations, councils, and regulatory boards. The need for approval depends on where your solar panel is being installed, where you live, and which part of your property you're using.

Should I choose a roof or a ground-mounted solar system?

If your roof works for solar and can fit enough solar panels to meet your energy needs, it's usually best to choose rooftop solar panels. If you need a really large system that won't fit on your roof and you have enough open land, opt for ground-mounted panels. Each property is unique.
