## Overview

---

All the top recent events in solar thermal and photovoltaic market. The latest research, innovative technologies, industry trends and forecasts, financial news, large projects, governmental policies in different countries.

All the top recent events in solar thermal and photovoltaic market. The latest research, innovative technologies, industry trends and forecasts, financial news, large projects, governmental policies in different countries.

The global solar market is burgeoning, and it's predicted that the world will have 1 trillion watts of installed solar PV capacity by 2023. There are enormous potential and massive opportunities for energy investors; as well as for renewable energy supporters who are striving to achieve SDG 7.

Join us at Solar Power World as we cover the world of solar news on technology, development and installation on a daily basis.

US energy infrastructure company Zenith Volts Corp (ZVC) has received county approval to build a 1.25-GW-plus data centre powered by a hybrid system, including solar, in New Mexico. Germany's Green Party has criticised Economy Minister Katherina Reiche's energy policy and set out four demands aimed.

National Grid Ventures (NGV) will test the world's first 100% hydrogen-fueled linear generator at its Northport plant for 12 months, supported by \$11 million in New York State funding. Maxeon Solar Technologies says its net loss widened to \$65.5 million in the first half of 2025, while Power.

Enviromena expands UK solar footprint with Longpasture acquisition, enhancing energy distribution with battery storage and powering 56,000 homes annually by 2027. Ohio's Power Siting Board greenlights EDF's 220-MW solar project, set to power 42,000 homes, boosting Central Ohio's energy future and.

Read the latest news and techniques for efficient solar photovoltaic power, new solar energy systems and more. How has the solar industry changed over

time?

The solar industry has always moved in waves – periods of steady progress punctuated by sudden leaps in technology. While it can. [Read More](#). The U.S. solar industry is very familiar with addressing market uncertainties.

What's happening in the solar industry?

NextEra expands West: Utah backs a 200MW Salt Lake City battery with a 25-year tax break, boosting grid stability & clean energy. 11.04 GW of new solar capacity in July, down about 48% YoY: China's PV sector sees a slowdown but shifts focus to quality and strategic. Trade wars & oversupply: India's solar industry at a crossroads.

What happened to solar power in H1 2025?

Reuters analysis shows utility-scale solar capacity still climbed 10 % in H1 2025, led by Texas and Arizona, even after tax-credit cuts. China's JinkoSolar files second EU Unified Patent Court case against rival Longi, claiming infringement of premium back-contact technology.
