

Local solar panel installers near me

Overview

Where should a solar power system be installed?

Regardless of the type of solar panel used, the most ideal setup for a solar power system is installing solar panels on a roof — in a region with long peak sunlight hours — with the panels facing south (for homes in the Northern Hemisphere). Investing in a solar power system is easier today than ever before.

Does local solar hire subcontractors?

Local Solar does not hire subcontractors for installation. We are a team of expert solar panel installers and use top-of-the-line equipment. We are licensed roofers as well, ensuring that the solar panels we install will not cause damage or leaking to your existing roof.

How do I get a solar panel installation project started?

Get your solar panel installation project started by requesting a free in-home energy consultation using the form above. Our licensed, local professionals will review your solar energy needs, provide product recommendations, and review your pricing and financing options.

Why should you choose local solar installation?

Local Solar provides high-quality, ready-to-build installations of solar panels for homes, which it passes on to its network of installers. By providing a project that is ready for installation, Local Solar frees up installers to do what they do best: install solar panels. This approach puts you in control of the installation process.

How does a local utility company approve a solar installation?

A local utility company approves the installation of solar panels by identifying any potential impacts on the grid from the solar power. This process is called interconnection. We selectively enter markets and only work with the best

Install Partners in our Network to ensure quality installs and great savings.

What are people saying about solar installation services in Los Angeles?

What are people saying about solar installation services in Los Angeles, CA?

"Tim and the team at AWS Solar did a very thorough job explaining what and why we needed to have a specific system that would satisfy our household's needs. High quality install and recommendations of areas that needed repair in advance of install.
