You can purchase marine solar panels directly from us and build up your own solar power system, or speak to our team of wind and solar experts about planning your energy needs for your trip to ensure your power system reliability.

What are the best marine solar panels?

Marine solar panels by Solara. For Yachts and boats. SunWorks UK. Marine solar panels for use in harsh marine conditions. These marine solar panels are suitable for all yacht and boat applications. They can also be used on off-shore platforms, buoys and life-rafts. Fully encapsulated with an extremely resistant protective film on the front and back.

Are marine solar panels worth it?

Marine solar panels can give you more freedom to explore without having to refuel, making it worth paying solar panel prices for the ability to run all your gear with just sunlight. You can even use solar energy to power the engines of some boats, letting you cruise the high seas indefinitely.

What is a marine solar panel kit?

Solar panel kits on this page are rated up to 130W and are meant for boating and marine applications. If you want to stay away from shore power then a marine solar panel kit is just what you need. Unlike a generator, solar panels are quiet, environmentally friendly and have no on-going costs.

Do marine solar panels work on boats?

Marine solar panels are designed to work specifically with boats, so you can power everything on board without having to return to shore or run a polluting generator. They function just like ordinary solar panels you'd find on the roof of a house, converting sunlight into usable, clean electricity.

Why should you use marine solar panels?

It is important to use marine solar panels to ensure that you have a system designed to withstand the harsh conditions at sea. Flexible solar panels can be used to create a flush finish and can even be walked on, or solid framed glass panels can be used for a higher power density and for extra mounting options.
