## Overview

---

When will a floating solar photovoltaic project start in Portugal?

In December 2021, the Minister of Environmental and Climate Action of Portugal announced the launch of an auction for 262 MW of floating solar photovoltaic (PV) capacity to be installed at seven dams across the country. The project is expected to be fully operational by 2023.

How many PV projects are mapped in Portugal?

Silva launched the “PV Map” in March 2023. He already manually mapped more than 1,000 PV projects across the country, corresponding to roughly 60% of Portugal’s total installed capacity, and is now looking for companies to volunteer information on projects not yet mapped.

What is Portugal's PV capacity?

The country’s cumulative installed PV capacity now stands at 5.66 GW, as it works toward a revised 20.8 GW target by 2030. Researchers in Portugal have simulated 800 power purchase agreements across eight different contract type and have found that contracts with a variable price structure achieve higher performance.
