## Overview

---

Why are PV power installations so expensive in Zambia?

However, the study also shows that the capital cost of PV power installations for microgrids are expensive in Zambia compared to other developing regions. There is a need for deliberate political drive and policies to increase penetration or installation of PV hybrid systems with a larger share from renewables.

What projects are being done in Zambia?

3) 175MW waste to energy power project in Chongwe District by IIB-DG Genniz Engineering Ltd. 4) 25MW hydro and solar hybrid power project in Kawambwa District by B&W Consulting Ltd. 5) 18.3MW hydroelectric project in Mwinilunga District by Synergy Contracting Zambia Ltd.

Can hybrid microgrids provide electricity to rural communities in Zambia?

The current study contributes to the general framework of rural electrification with hybrid micro-grids that can be implemented to supply electricity to rural communities in Zambia. More importantly, it contributes to the definition of a reference for implementing hybrid microgrids for rural electrification.

How does economic development affect rural electrification projects in Zambia?

For example, economic aspects of grid expansion and a lack of economic activities in rural areas hinder rural electrification projects in Zambia and in cases where there is a greater need for electricity, diesel generation plants are used.
