

Mobile solar station quotation in Hungary 2026

Overview

How many solar facilities will Hungary have in 2026?

In another tender, for a wider range of companies, contracts are being signed to support the completion of 50 facilities in 2026 with HUF 62bn of state contributions. Lantos said Hungary's solar energy capacity has surpassed 7.5 GW.

Why do Hungarian companies invest in solar power plants?

It is a strategic goal of the Hungarian government to increase the share of renewable power generation. Consequently, the domestic regulatory environment supports utility-scale solar power plants. The current energy prices make the investment profitable for many industrial companies as well.

How big is the photovoltaic system in Hungary in 2023?

At the end of 2023, the installed capacity of photovoltaic systems in Hungary was already 5.6 GW, which means an increase of more than 100% within just a few years. In 2023, expansion was around 1.6 GW, which represents an increase of 45% compared to 2022.

How many solar plants will Hungary have by 2030?

Lantos said Hungary's solar energy capacity has surpassed 7.5 GW. By 2030, they are calculating that there will be 12 GW of solar plants, but additional network investments will be needed to connect this capacity to the grid.

How much solar power does Hungary have?

"The numbers speak for themselves": Hungary will have achieved a total solar capacity of over 5,500 megawatts (MW) by the beginning of November 2024, with this capacity being made up of two main areas. Around 3,300 MW are accounted for by industrial solar power plants, which are used for large-scale energy supply.

How has Hungary progressed in the development of solar energy?

Hungary has made significant progress in the expansion of solar energy in recent years, both in the area of private solar installations and in the construction of large industrial solar power plants.
