

# **Mobile solar station quotation in Ireland 2025**

## Overview

---

What is the scale of solar in Ireland 2025 report?

Solar Ireland has launched the Scale of Solar in Ireland 2025 Report to mark European Solar Day, capturing the latest trends, milestones and insights on how solar is powering Ireland's clean energy transition. The report also highlights: Explore the key data, sector insights and community stories in this year's report.

What happened to solar panels in Ireland in 2023?

In May 2023, the Irish government abolished the 13.5% VAT on the supply and install costs of solar panels, instantly cutting about €1,000 off the average installation cost. Prices remain much the same this year compared to last. The grant has come down over this period so this points to a modest reduction in costs.

How much does solar PV cost in Ireland?

Let's take a broader look at Solar PV pricing in Ireland. In 2025, our research shows installing solar panels on an Irish home generally costs from €3,200 to €15,600, depending on system size and setup. Grants are already factored into these prices.

How much do solar panels cost in 2025?

The average price for a typical household is €6,800 – €7,800 for 12 to 14 solar panels, after taking the €1,800 SEAI grant into consideration. Thanks to advances in solar cell technology, improved manufacturing scale and domestic government policy – PV panels cost significantly less in 2025 than in previous years.

Will 2025 be a big year for solar power in Ireland?

2025 promises to be a huge year for solar power in Ireland with the ever growing number of homes and businesses installing rooftop solar, and the

growing number of solar farms in the country under construction or in the pipeline. Lets look at some of things which we may come to see in the coming year for the solar energy sector.

Are solar panels a good investment in Ireland?

Solar panels in Ireland are now a dependable source of energy. They have become a smart and popular way to lower your electricity bills and use less power from the grid. But to get the most value from your solar system over time, it's important to think about more than just the upfront cost.
