

# **Mobile solar station quotation in Poland 2025**

## Overview

---

Will solar power be a good investment in Poland in 2025?

Thanks to additional government subsidies for small private PV systems and high electricity prices of over 30 eurocents per kilowatt hour for companies, investments in own electricity generation in both areas will become attractive in 2025. In September 2024 alone, PV systems with a total power of 363.53 megawatts were installed in Poland.

When will the solar energy regulations be implemented in Poland?

In Poland, the regulations will be implemented gradually: From 2026 for new commercial and public buildings. From 2029 for new residential buildings. This regulation will significantly increase the number of installations, especially in the construction sector, contributing to the popularization of solar energy.

When will photovoltaic installations be mandatory in Poland?

New EU regulations make it mandatory to install photovoltaic installations on the roofs of buildings in member states. In Poland, the regulations will be implemented gradually: From 2026 for new commercial and public buildings. From 2029 for new residential buildings.

What will PV subsidies look like in 2025?

Projections for PV subsidies in 2025 indicate an increasingly diversified and integrated approach to supporting investment in renewable energy sources. Particular emphasis is being placed on energy efficiency, integration of different technologies and support for energy communities and prosumers.
