

Mobile solar station turnkey solution price in New Zealand

Overview

With only six solar panels and two battery modules, this Tiny system is really only suitable for high sunshine areas. However, it can be easily and cost-effectively.

The PS: Tiny base system is designed to run basic appliances only. These could include: 1. Up to four or five LED lights on at the same time 1. Small fridge/freezer 1.

All off-grid solar systems have limitations. This is based on the number of panels, the size of the battery bank, and the capacity of the inverter/s. The PS: Tiny system is a small system for very basic requirements and will not be able to power the following. Attempting to do so may cause damage and void your warranty: 1. Electric hot water 1. Ele.

The sizing of our off grid solar systems are intended to be a basic guideline; a starting point. The fact is, there is no 'one size fits all' solution. All systems are customised to your specific situation. The number of solar panels needed will depend on your region. This may affect your final price. It's because different areas around New Zealand.

Use our expertise to see if the PS: Tiny system is right for you. When you are ready to get in touch, you can use our free and no obligation design service. We'll help you to accurately size your system.

Pricing is from \$15,995 inc GST. For more information on system sizes and pricing, click below or contact us for free expert advice. An off-grid solar power system means on-demand, uninterrupted access and enjoyment of electricity when you need it. How many solar installations have we completed in New Zealand?
