The following article presents five of the most important renewables EPC companies in Europe: 1. Intec Energy Solutions (Nürnberg, Germany) Intec Energy Solutions is one of the largest EPC companies in Europe.

What does an EPC company do?

EPC companies provide comprehensive services for the development, design, construction and often also the operation and maintenance of projects in various industries, one of which is the renewable energy sector. Here, EPC companies play a crucial role in the successful implementation of solar parks, wind farms and more.

How much does it cost to install solar panels?

The simple answer is that it will cost around €5000 (for six solar panels) and €12,000 (for 18 solar panels), including an inverter and installation, but excluding VAT. As of January 2023, you do not have to pay VAT on solar panels for your home. Solar panels are a big investment. Image: Freepik.

Can I buy solar panels without paying VAT?

Currently, there is no more VAT on solar panels, which means you can buy solar panels without having to pay any extra taxes on top of the initial purchase costs. The netting scheme (salderingsregeling) is an arrangement where you can earn money for the excess energy your solar panels generate.

How much money can you save with solar panels?

On average, you could save between €1,200 and €1,450 per year on energy bills if you have solar panels installed. But (surprise, surprise) the amount of money you could save varies based on how much energy your solar panels produce and the average electricity prices throughout the year.
