

Mobile solar unit quotation in Croatia 2025

Overview

Will Croatia launch a solar tender in 2025?

According to the country's indicative annual publication plan for 2025, published on 8 January, Croatia plans to launch two solar tenders. The first tender, with a budget of €10 million, will be aimed at installing residential solar arrays in the second quarter of 2025 and will cover up to 50% of the investment costs.

How much does a solar tender cost in Croatia?

The first tender, with a budget of €10 million, will be aimed at installing residential solar arrays in the second quarter of 2025 and will cover up to 50% of the investment costs. Additionally, the Croatian authorities will announce a €25 million call to co-finance solar plants and heat pumps for the public sector in the second quarter.

How much will Croatia spend on solar?

Croatia is set to allocate €25 million for solar plants and heat pumps in the public sector and will also issue a €10 million residential solar tender. This is part of a larger €652 million package aimed at renewable energy and decarbonisation.

How many public calls will Croatia make in 2025?

Another call for end users is expected in the first half of the year. Croatia's Environment Protection and Energy Efficiency Fund (FZOEU) will distribute €125 million across nine public calls in 2025. The Ministry of Environmental Protection and Green Transition (MZOZT) will administer 23 public calls this year, amounting to €526.8 million.

Photovoltaic Power Plant in Croatia 2024

Croatia, with its abundant solar radiation and coastal areas, offers potentially advantageous conditions for the installation of photovoltaic power plants. However, placing these plants on properties in coastal areas brings ...

Efficient Higher Revenue

- Max. Efficiency 97.5%
- Max. PV Input Voltage 600V
- 100% Peak Output Power
- 2 MPPT Trackers, 100% DC Input Utilization
- Max. PV Input Current 15A, Compatible with High-Power Modules

Intelligent Simple O&M

- IP65 Protection Degree: support outdoor installation
- Smart I-V Curve Diagnosis Function: locate PV string faults accurately and automatically detect faults
- DC & AC Type II SPD: prevent lightning damage
- Battery Reverse Connection Protection

Flexible Abundant Configuration

- Plug & Play, EPC Switching Under 10min
- Compatible with Lead-acid and Lithium Batteries
- Max. 6 Units Inverters Parallel
- AFC Function (Optional): when an error is detected the inverter immediately stops operation
