

Modular solar power container quotation in Brazil 2025

Overview

How much is a solar module worth in Brazil?

This capacity, worth \$1.2 billion, exceeds the \$1.13 billion import quota set by the Brazilian authorities for exemption from 9.6% import duties on solar modules from January to June 2024. The next round of tax-free import quotas is set at \$1.014 billion from July 2024 to June 2025 and may be exhausted quickly.

How many solar modules does Brazil import?

From pv magazine Brazil Brazil imported around 10.1 GW of PV modules between January and May, according to PV InfoLink. This capacity, worth \$1.2 billion, exceeds the \$1.13 billion import quota set by the Brazilian authorities for exemption from 9.6% import duties on solar modules from January to June 2024.

How much does a solar module cost?

The government will impose taxes if the import limit is exceeded, and higher shipping costs could also drive up solar module prices. "The container costs around \$2,500 to \$2,300, and it recently jumped to \$9,300," WIN Distribuidora Commercial Director Camilla Nascimento told pv magazine.
