

Multi solar controller manual

Overview

How does multi solar work?

Multi Solar will sense a fault in roof or pool sensors, and indicate it by flashing PPP or rrr . In this state the unit will not work properly until serviced. Multi Solar is designed to give you year round automatic control of your swimming pool solar heating system.

What is a MS3D solar pump controller?

The MS3D is a standard differential solar pump controller for solar pool heating. It can be used on any solar pool heating system and is designed to give you year round automatic control of your system.

How do I install a multi solar pool?

Electrical building regulations specify that Multi Solar must not be mounted within 3 meters of the pool. Fix the unit to a wall or post, within 1.5 meters of a 240 volt outlet and within 2 meters of the Solar pump. Mounting points are provided on the back. Two sets of temperature sensor cables are supplied.

How do I Turn Off the ascon pool MS3D Solar System?

To turn off the Ascon Pool MS3D solar system, press the "+" and "DISPLAY" buttons together. The display will flash between "OFF" and the current pool temperature, the "Override" LED will flash, and the pump will turn off and stay off until the buttons are operated again. This answer is automatically generated.

How to install a solar control unit?

This Solar Control unit Must be installed in the upright position. **INSTALLATION:** Avoid cutting the sensor lead (excess can be neatly coiled). If the cable is cut, it must be reconnected with the POSITIVE (stripe) to the POSITIVE, and the NEGATIVE (no stripe) to the NEGATIVE. Do not place any wire joins under ground. Power connection.

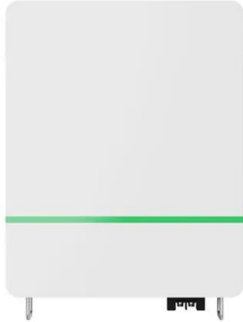

How many cables do I need for a solar control unit?

Two sets of temperature sensor cables are supplied. One short (3m) for the pool and one long (24m) for the roof. This Solar Control unit Must be installed in the upright position. INSTALLATION: Avoid cutting the sensor lead (excess can be neatly coiled).
