Overview

Solar industry news: Mounting, inverter, PV module, tracker and energy storage trends; net metering regulation; financing, buying trends and more. Discover the leading solar sales proposal, design, plan set, and customer service software solutions of 2025. Explore new.

Solar industry news: Mounting, inverter, PV module, tracker and energy storage trends; net metering regulation; financing, buying trends and more. Discover the leading solar sales proposal, design, plan set, and customer service software solutions of 2025. Explore new.

The global solar market is burgeoning, and it's predicted that the world will have 1 trillion watts of installed solar PV capacity by 2023. There are enormous potential and massive opportunities for energy investors; as well as for renewable energy supporters who are striving to achieve SDG 7.

Join us at Solar Power World as we cover the world of solar news on technology, development and installation on a daily basis.

National Grid Ventures (NGV) will test the world's first 100% hydrogen-fueled linear generator at its Northport plant for 12 months, supported by \$11 million in New York State funding. Maxeon Solar Technologies says its net loss widened to \$65.5 million in the first half of 2025, while Power.

US energy infrastructure company Zenith Volts Corp (ZVC) has received county approval to build a 1.25-GW-plus data centre powered by a hybrid system, including solar, in New Mexico. Germany's Green Party has criticised Economy Minister Katherina Reiche's energy policy and set out four demands aimed.

Enviromena expands UK solar footprint with Longpasture acquisition, enhancing energy distribution with battery storage and powering 56,000 homes annually by 2027. Ohio's Power Siting Board greenlights EDF's 220-MW solar project, set to power 42,000 homes, boosting Central Ohio's energy future and.

Read the latest news and techniques for efficient solar photovoltaic power, new solar energy systems and more.

News about solar panels

The exponential growth of solar power will change the ...

Solar cells will in all likelihood be the single biggest source of electrical power on the planet by the mid 2030s. By the 2040s they may be the largest source not just of electricity but of all
