

Off-grid solar container quotation in New Zealand 2030

Overview

Ready to Cost Off Grid Solar NZ?

Request a free, itemised quote and we'll match a system to your home size, sun hours, and budget. Consequently, you'll know exactly what you're paying for and what output to expect. Why does New Zealand have a small off-grid Solar System?

It's because different areas around New Zealand have varying official sunshine hours according to NIWA. You can read more in our latest article "Off Grid Solar For Dummies". The PS: Tiny off grid system only comes with six solar panels (2.58kW total). This will not be sufficient for many locations around Aotearoa.

How much does an off-grid solar system cost?

Prices Slashed on Selected Off-Grid Systems. Limited Time Our new ULTRA off grid solar systems using the latest technology are made in New Zealand and priced from \$15,995 inc GST. The base system sizes below are a guideline only.

What are the limitations of an off-grid Solar System?

All off-grid solar systems have limitations. This is based on the number of panels, the size of the battery bank, and the capacity of the inverter/s. The PS: Tiny system is a small system for very basic requirements and will not be able to power the following. Attempting to do so may cause damage and void your warranty:.

How many kWh will a small off grid solar system provide?

Allowing for this, the PS: Tiny off grid solar system will provide an estimated 4kWh per day. The exact number of panels needed depends on your situation. Get in touch and we can check your situation.

What does an off-grid solar package include?

Our off-grid solar packages include everything you need to go off the grid in New Zealand: solar panels, batteries, charge controllers, inverters, cables, and DIY-friendly manuals backed by our lifetime support. Browse through our series below.

Do off-grid solar systems need a generator?

Even the best off-grid solar systems may need support during long stretches of cloud or high demand. A generator acts as your backup - automatically kicking in when battery levels get low. The right choice depends on your system size, usage patterns, and whether the generator is for backup only or plays a regular supporting role.
