Upgrade your shipping container home or office with a solar power kit and make the transition to off the grid living effortless! This system is designed to easily connect all your essential appliances (air-conditioners, computers, lights, microwaves and more). It's equipped with a 3000 watt power.

This is a practical and economical way for those who build off-grid container homes in remote areas or want to reduce energy expenses. A 20-foot-long container roof can be installed with 6 to 12 solar panels, with a total power of 1.8 to 3.6 kilowatts peak (kWp); while a 40-foot-long container can.

However, prices aren't always simple—they vary depending on size, materials, certifications, and location. Let's break down what really goes into the cost and whether it's worth your money. The final cost of a solar container system is more than putting panels in a box. This is what you're really.
