## Overview

---

Where can I find off-grid solar systems?

Trinity Suite, Office 4, Hawkesyard Hall, Rugeley, Staffordshire WS15 1PU  
Worldwide specialist provider of off-grid solar systems with off-grid battery storage systems for residential and commercial markets.

Should you install your off-grid Solar System yourself?

By incorporating expert's advice and experience into your off-grid solar system design, you'll reduce the risk associated with doing the installation yourself. There are a few things that need to be analysed, including installation and specifications.

How do I design an off-grid solar power system?

The most important step in designing and sizing an off-grid solar power system is to determine what your energy load is. We offer a range of off-grid solar systems to meet most households, tiny homes or cabins' budgets.

Who is off grid installer?

Power where it's needed. Anytime. Anywhere. With excess of twelve years' experience in the design and installation of domestic and commercial bespoke installations, Off Grid Installer offers renewable energy systems tailor made to suit their client's individual circumstances.

What is involved in an off-grid solar installation?

To get started, here's an overview of what's involved in an off-grid solar installation: 1. Battery Bank The battery bank should be installed in a well-ventilated and temperature controlled enclosure, like a garage or a shed. Very hot temperatures shorten battery life, while cold temperatures reduce battery capacity and make charging more sluggish.
