Panel solar installation tips

Overview

How to install solar panels?

The first step in solar panel installation is fixing the mounting structure to support the panels. The whole mounting structure must be tilted and have an angle between 15 to 20 degrees to have maximum sunlight exposure. For countries in the Northern Hemisphere, the best direction to face solar panels is south because it gets maximum sunlight.

Should you install solar panels yourself?

You can install solar panels yourself, but doing it alone involves risks—especially when working against a deadline. Incentives can drastically lower your overall cost, but solar is still a big investment. To save money, it's no surprise that many homeowners consider a DIY approach.

Is a DIY solar panel installation a good idea?

A DIY solar panel installation is not the best option if you still rely on utility energy, which most people do. Installing solar panels without the proper expertise can lead to major issues that may cost you more in the long run.

How do I install a solar inverter?

Inverters convert the DC energy generated by solar panels into AC energy for household use. Choose between string inverters (cost-effective) and microinverters (panel-level optimization). Securely mount solar panels on your chosen location using mounting racks. The type of rack will depend on whether the installation is on a roof or the ground.

Where should solar panels be installed?

For most residential installations, rooftops are the preferred location for solar panels. Ensure your roof is structurally sound and faces the right direction to maximize sun exposure. South-facing roofs typically receive the most sunlight. If your roof is not suitable for solar panels, consider ground-mounted options.

Which direction should solar panels be installed?

For countries in the Northern Hemisphere, the best direction to face solar panels is south because it gets maximum sunlight. So install the structure accordingly. For Sloped Roofs - a railed system is commonly used. This consists of attaching a set of rails to the roof to hold the solar modules.
