## Overview

---

How long does it take to install solar panels in Phoenix?

Efficient Solar Panel Installation with Minimal Disruption! Our skilled technicians in Phoenix install your solar panels quickly and proficiently, often within a single day. We respect your time and property, guaranteeing a swift and smooth installation process that sets you up for immediate solar benefits.

How much does a solar panel installation cost in Arizona?

A typical solar panel installation costs anywhere from \$7,560 to \$21,600 in Arizona. Prices in Phoenix are comparable, ranging from \$7,618 to \$21,767 on average. Installers usually price systems according to their wattage. Nationally, costs per watt range from \$2.50 to \$5. In Phoenix, the average cost per watt is \$2.18.

What are people saying about solar installation services in Phoenix?

What are people saying about solar installation services in Phoenix, AZ?

"Aneva solar was great from start to finish. They were very clear and helpful during the initial stage of looking at solar, and we're not at all pushy. Once we decided to go with them, the great service continued. Communication was excellent.

How does solar PV installation work in Phoenix?

Once we affirm that the property is a good fit, we will submit a Solar PV application in Phoenix. This initiates the process with the government in order to get a solar permit for your property. Once we receive the permit from the government, we will begin the installation process.

Are solar panels free in Phoenix?

We're not aware of a totally free solar option in Phoenix. You can lease or enter a power purchase agreement with minimal upfront costs. However,

there is usually a low ongoing monthly fee. In general, beware of deals that sound too good to be true. What are the different types of solar panels?

.

Are solar panels a good investment in Arizona?

Arizona has some of the highest potential for solar energy of all states, and Phoenix gets significant sunshine year-round. The main drawback is the high upfront cost of purchasing and installing the panels and equipment. Assuming an upfront purchase, it takes about 7 years to break even (when your savings with solar panels make up for the cost).
