

Planet locations in our solar system

Planet locations in our solar system

Solar

[The Planets Today : A live view of the solar system](#)

The planets today shows you where the planets are now as a live display - a free online orrery. In this solar system map you can see the planetary positions from 3000 BCE to 3000 CE, and also see when each planet is in retrograde.

[Solar System - Definition, Facts, Planets](#)

The Solar System is the gravitationally bound system of the Sun and all celestial bodies that orbit it. This includes planets, moons, asteroids, comets, dwarf planets, and countless particles of dust and ice. It is our cosmic ...

[Planets in Order From the Sun , Learn About The ...](#)

Our solar system is made up of 8 planets that orbit the Sun. Learn about all the planets in order from closest to farthest! Find images, facts, and useful information about each planet, and its moons if it has any, and go ...

[Position of the planets in the Solar System](#)

Position of each of the planets of the solar system (Mercury, Venus, Earth, Mars, Jupiter, Saturn, Uranus and Neptune) in their orbits with respect to the Sun for any date and time.

Position of the planets in real time and accelerated ...

ESS

[Our Solar System: A Tour of All the Planets](#)

The solar system is our cosmic neighborhood, a sprawling and dynamic family of celestial bodies orbiting a single, blazing star: the Sun. It's a place of fire and ice, storms and stillness, desolation and beauty. The planets, ...

In Depth , Our Solar System - NASA Solar System Exploration

The planetary system we call home is located in an outer spiral arm of the Milky Way galaxy. Our solar system consists of our star, the Sun, and everything bound to it by gravity - the planets ...

[Where are the Dwarf Planets? Interactive live map](#)

*This Interactive 3D Simulation is built on data provided by NASA JPL HORIZONS database for solar system objects and International Astronomical Union's Minor Planet Center. Distances and speeds are estimates based on ...

[A Complete Guide to the Solar System and the Night ...](#)

Please set your location so we can show precisely what's visible in your night sky. Without your location, we will use Greenwich as a default, but visibility information and star map automatic orientation might be off.

Solar System

The Solar System includes the Sun and all objects that are bound to it by gravity and orbit it. [14][15][16] The International Astronomical Union describes the Solar System as all objects that are bound by the gravity of the Sun, the Sun itself, ...

[Solar System Facts , Information, Size, History and...](#)

The solar system consists of the Sun; the eight official planets, at least three "dwarf planets", more than 130 satellites of the planets, a large number of small bodies (the comets and asteroids), and the interplanetary medium. (There are ...

The Planets Today : A live, central earth (geocentric) view of the

A Geocentric View of the solar system This page provides a different way of looking at the solar system. It is geocentric and shows where the Sun and all the planets (and the moon) are in the ...
