

# Portable pv system quotation in Estonia 2030

## Overview

---

Can rooftop PV installations support the energy transition in the Baltic states?

Considering the above, the Baltic States have significant technical potential for rooftop PV installations to support the energy transition. EU policymakers have highlighted renewable energy communities as a key driver of this transition, as they promote citizen participation and local control over renewable energy decisions .

What is the estimated rooftop PV potential for EE?

Using the results of BISE , the estimated rooftop PV potential for EE is 6 TWh, LT 27 TWh, and LV 12,9 TWh. The authors have developed a clear geospatial methodology, utilizing the latest EU building stock spatial data to accurately quantify the roof area available for PV system installations.

Can rooftop photovoltaic systems be used in multi-apartment buildings?

The study evaluates the LCOE for rooftop photovoltaic (PV) systems in multi-apartment buildings in the Baltic States, focusing on cost projections up to 2050. Using Monte Carlo simulations and stochastic modeling, the research incorporates key economic parameters such as CAPEX, OPEX, and discount rates to assess future LCOE trends.

## Portable pv system quotation in Estonia 2030
