

Portable pv system shipping and installation cost in Sweden

Overview

How much does a PV system cost in Sweden?

Figure 10: Average of 15 Swedish installation companies cost structures for a typical turnkey grid-connected roof-mounted residential PV system (4–6 kWp) to the end customer in the end of 2015. The average price was 19.45 SEK/Wp.

Where are PV installations located in Sweden?

Geographical Distribution and Market Segmentation: The report reveals that the majority of PV installations are concentrated in the southern parts of Sweden, with Gothenburg, Uppsala, and Linköping leading in total installed capacity.

How many PV modules are installed in Sweden?

Overall about 5.9 MWp of Swedish produced modules has been installed in Sweden since 2010. The dominant market share of China has also declined over the years, and especially since 2013. This correlates with the import duties on Chinese PV modules and cells that were introduced in 2013.

Why does Sweden only know how many PV systems are installed?

69 informed that one of the larger grid operators in Sweden only has information about the number of PV systems, and not the power, installed in their grid over a period due to deficiencies in the registration of the PV installations under that period.

How much electricity does a PV system produce in Sweden?

This can be compared to the theoretical production of $192.9 \text{ MWp} \times 950 \text{ kWh/kWp} \approx 183 \text{ GWh}$ from all grid-connected PV systems in Sweden. So only about a 25 % of the PV produced electricity received certificates in 2016.

What policy framework supports PV development in Sweden?

Policy and Regulatory Environment: The report outlines the current policy framework supporting PV development in Sweden, including the impact of the renewable electricity certificate system and the tax deduction for green technology.
