

# **Portable solar container turnkey solution price in Australia**

## Overview

---

What is a shipping container solar solution?

It's a modified shipping container built to house solar panels, batteries, inverters, and other off-grid power systems. These units are ideal for powering remote sites, construction camps, emergency setups, or as a portable backup energy system.

What is a solar container build?

It's a modified shipping container built to house solar panels, batteries, inverters, and other off-grid power systems. These units are ideal for powering remote sites, construction camps, emergency setups, or as a portable backup energy system. What's included in a solar container build?

.

What is an Offgrid solar container?

Our offgrid solar containers are designed to be a portable system to enable power on site quickly and easily. If you are using the container as a permanent power supply, an electrician will be required to install suitable earthing & testing.

What does a modbox solar container include?

A typical ModBox solar container includes battery storage, inverter setup, internal racking, cabling, ventilation, and secure access. We can also include external solar panel mounting or integrate with your existing array. Can I use a solar container to power other ModBox units?

Absolutely.

Are solar containers safe?

Yes — all solar containers are built from weatherproof, lockable shipping

containers. Your gear is safe from the elements and secure from unauthorised access. Can the system be expanded later on?

## Portable solar container turnkey solution price in Australia
