Being off grid is a fairly broad term that encompasses many things. It could mean being completely disconnected from anything: you generate all your electricity, sewage, food, and heating needs yourself. But it also means using clean energy solutions to power your own home whether you're connected.

This means that the average investment in a photovoltaic system will pay off within 6-9 years. Let's get down to specifics, i.e. the individual components of photovoltaic installations. The following article explains the current condition of the photovoltaics sector both in Poland and.
