Find out how we can help. What is an EPC in Greece?

“Energy Label” is another word used for EPCs and means the same thing. EPC’s apply to all buildings including residential buildings, offices, and warehouses, but for the sake of simplicity, we’ll focus on EPC’s for residential buildings. Do I Need an EPC to Build or Own in Greece?

.

Do I need an EPC if I buy a house in Greece?

If you’re buying a home in Greece, it’s not your responsibility to get an EPC. The responsibility goes to the owner. The certificate is necessary in order to sell or rent out a building that is more than 50 square meters. Estate Agents in Greece are also obliged to list the energy efficiency class of a property on sale or rental advertisements.

Do you need an EPC in a rental agreement?

As a seller, you are obligated to include the EPC in the rental agreement. For the issuance of an EPC, you need to conduct an energy audit, which will calculate the property’s energy rating. The inspection is done by an specialized engineer from the Energy Inspectors record. The cost depends on the size of the property.

How long does an EPC last?

An EPC is calculated from a number of factors, like the construction materials, the type of boiler, insulation, and heating systems. Once an EPC is issued, it lasts for a period of ten years. Which Category am I Likely In?

These are mainly for modern buildings constructed after 2012.

How do you know if a building is energy efficient in Greece?

In Greece, the letters will be in Greek as in the chart below (A+, A, B+, B, Γ, Δ, E, Z, H). A+ is the highest possible rating. Without going into too many details, the score is determined by comparing a building's energy use compared to a building with "ideal characteristics" - in other words, a building with near perfect energy efficiency.
