Power container EPC service price in Serbia

Overview

What should Serbia do with the electricity integration package?

Serbia should focus on the transposition and implementation of the Electricity Integration Package as a precondition for the coupling of its short-term markets. Serbia should certify the gas transmission and storage operators, grant third party access at the interconnection points, and remove any other obstacles to new market entrants.

Will EPs be deregulated in Serbia?

EPS continues to satisfy nearly all consumption in Serbia. A Government's recommendation on maximum retail prices of EPS at the outset of the energy crisis in 2021 led to consumers switching back to EPS. AERS's reports for 2022 repeatedly concluded that deregulation of prices for universal service would be premature.

How many PECI projects are there in Serbia?

There are three electricity PECI projects in Serbia, all part of the so-called Transbalkan corridor. Two are still not finished. Section 3 (2x400 kV OHL Obrenovac - Bajina Basta) is in a preparatory phase with construction to be finished in 2026.
