How will powerchina select a qualified supplier for energy storage system equipment?

According to the previously announced plan by PowerChina, this tender aims to select qualified suppliers for energy storage system equipment for 2025-2026. After the selection, a framework agreement will be signed.

Why are container prices slashing in China?

Container Prices continue to slash in China The average price of 40ft high-cube containers in China has been on a clear downward trajectory, reflecting weaker demand for container purchases. Prices have declined by 11%, from \$2,859 in November 2024 to \$2,539 as of March 18, 2025.

What is China's container crisis?

China's Container Crisis: Falling Rates and Cooling Demand Concern Traders & Lessors Shanghai, China, March 21, 2025 — China's container logistics businesses face mounting pressure as declining container prices and leasing rates caused by weak cargo demand strain the industry.

Is China's container price softening a regional trend?

The data suggests that the container price softening seen in China is part of a broader regional trend, reinforcing the notion of market correction across Asia due to weaker demand and increased inventory build-up. Container leasing rates decline; clear indication of demand weakening in China.

Does China have a downward trend in container pricing?

This downward trend in container pricing is not unique to China. Key container trading hubs in Asia, including Hong Kong, Singapore, Nhava Sheva, Haiphong, and Ho Chi Minh City, are experiencing similar declines, mirroring the price corrections observed in China.

## Why is container demand declining in China?

Container demand decline is already evident in China, reflected in weakening rates. The ongoing accumulation of inventory further slows demand for new container movements, contributing to a market imbalance. If a ceasefire in the Red Sea materializes later this year, further capacity loosening could push container rates even lower.
