

# **Power container quotation in Ukraine 2025**

## Overview

---

Ukraine's export engine keeps running—but 2025 margins will swing on EU market access and security-linked logistics costs. Investors who lock in flexible routes, mixed commodity baskets and political-risk cover stand to capture the upside of an anticipated bumper harvest and a cautious steel.

Ukraine's export engine keeps running—but 2025 margins will swing on EU market access and security-linked logistics costs. Investors who lock in flexible routes, mixed commodity baskets and political-risk cover stand to capture the upside of an anticipated bumper harvest and a cautious steel.

Freight & storage demand likely to rise Q4-2025. Corridor open yet costly: war-risk cover inflates FOB prices. Premiums set to stay; consider joint-venture cover pools or rail-Danube alternates. Surviving mills lifted steel output >9 % y/y (Jan-Feb) and iron-ore exports doubled to 33 Mt in 2024.

Ukraine's electricity imports plummeted by 31% in April 2025, according to data from the Ukrainian expro consultancy, marking a critical milestone in the country's efforts to stabilize its energy sector amid ongoing Russian aggression. The reduction—from 272 gigawatt hours (GWh) in March to 187 GWh.

In December 2024, Russia conducted its 12 th large-scale assault on Ukraine's energy infrastructure this year, damaging transmission grids and power facilities, especially in the western border regions (BBC News, 2024) From October 2022 to April 2023, 43% of Ukraine's main power grid was damaged.

An enhanced mechanism for transmitting power across the Dnipro River has strengthened the power supply situation on the left bank, which faces deficits in power generation capacity. Electricity export (- minus) and import (+ plus) during the month The average power generation load was the same as.

The ongoing Russian aggression has turned Ukrainian energy sector into a critical battlefield, with Russia's relentless attacks targeting infrastructure that sustains Ukraine's power grid and heating systems. Since the full-scale invasion began in February 2022, these attacks have inflicted.
