

Power home solar cost

Overview

The average cost of solar panels ranges from \$2.50 to \$3.50 per watt installed, with most homeowners paying between \$15,000 and \$35,000 for a complete system before incentives. After applying the 30% federal tax credit, net costs typically range from \$10,500 to \$24,500. How much does a solar battery cost?

A whole-home solar battery costs between \$1,700 and \$9,000, or around \$3,900 on average for 10 kilowatt-hours (kWh) of storage for materials. Labor can vary by size, location and complexity. Solar batteries store excess solar power in case it's needed, and this battery size can power most essentials in a home during an outage for several hours.

How much do solar panels cost?

For an average 6.5 kW solar system, you'll spend anywhere from \$16,600 to \$20,500 before accounting for tax credits or rebates. You can break down the bulk of the cost of your solar panel system by looking at the panels and equipment, labor and permits. Solar panels cost between \$0.30 and \$0.90 per watt without labor and other fees.

How much does a home solar system cost?

According to the SEIA, home solar systems have an average price of \$3.24 per watt in the U.S. before incentives. Comparatively, our team found an average cost per watt of \$3.10 based on our survey responses. Note that system pricing can vary based on the solar panel and equipment brand, installer, location and more.

How much does it cost to clean solar panels?

During your service, a professional solar technician will inspect your panels and clean them. The average cost to clean solar panels ranges from \$5 to \$25 per panel, depending on the project scope and accessibility. Cleaning your solar panels helps ensure that they produce the most energy possible.

How much does a commercial solar system cost?

Commercial solar installations are a great way for companies to lower energy costs. Generally, installing solar panels on businesses costs a bit less per watt because the systems are larger, but the total costs will be higher. In 2025, the average cost for commercial solar panels is just about \$2.00 per watt.

Is home solar more affordable than paying for utility electricity?

Although home solar is already more affordable than paying for utility electricity, there are a few ways to reduce the cost of your system and maximize your energy cost savings. First, there are solar incentives offered by federal, state, and local governments, in addition to utility providers.
