Customizable**

## Overview

---

What warranties does a solar system have?

Today, most home solar energy systems include three primary coverages: product warranties, performance guarantees, and installation warranties. 1. Product warranties A solar product warranty covers the physical components of your system, such as the panels, inverters, or batteries.

What is a solar contractor warranty?

Solar contractor warranties are essential to your solar energy system's overall protection. These warranties, provided by the installer, generally cover workmanship and installation issues. They ensure the solar panels are correctly installed, and the system operates as intended. The duration of contractor warranties can vary.

How long does a solar installation warranty last?

Offered by your installer, contractor, or solar company, installation or workmanship warranties are essential in guaranteeing the quality, longevity, and ROI of your installation. Workmanship warranties can differ widely between solar companies, with coverage typically lasting anywhere between 1 to 10 years, depending on your installer.

Do solar panels have a warranty?

Any reputable solar panel manufacturer will offer two warranties: a product warranty and a performance warranty. These cover manufacturing faults and guarantee a certain level of performance for your panels. Product and performance are the two basic warranties to watch when researching solar panel brands to invest in.

What is a solar warranty & how does it work?

When you install solar, your warranty won't take the form of a single policy, but rather several different coverages offered by your installer and the

manufacturers of your solar equipment. Today, most home solar energy systems include three primary coverages: product warranties, performance guarantees, and installation warranties. 1.

What is a solar panel performance warranty?

The average solar panel performance warranty will guarantee a panel's power output won't drop by more than 2% after the first year and no more than 0.5% each year after that for the remainder of the warranty period. Degradation rates vary based on the manufacturer.
