

Residential solar panel systems calgary

Overview

Who is Solaris in Calgary?

We established Solaris in Calgary to deliver solar solutions throughout Alberta. Every customer we serve is treated like family. We pride ourselves on giving clear and straightforward advice, which helps our customers make well-informed decisions about solar energy.

Where can solar panels be installed?

We install solar photovoltaic (PV) panels for residential and commercial properties in southern Alberta, and supply PV parts to solar enthusiasts and DIYers throughout Western Canada. We can add solar to any building with any type of roofing while optimizing value for long-term performance.

How does Solun solar work in Calgary?

Solun designs solar systems in Calgary that let you produce your own electricity—and sell surplus power back to the grid for ongoing savings. As a qualified microgenerator in Alberta, you are eligible to sell carbon offset credits. This added incentive helps maximize your return on investment while reducing your household's carbon footprint.

Why is solar a growing trend in Calgary?

Why Solar Now?

Solar Adoption in Calgary is Accelerating! Residential solar is growing in popularity across Calgary, as evidenced by the exponential trends in microgeneration system registration published by AESO. June 2024 numbers show nearly 24,000 registered systems compared to about 14,000 just one year ago.

What factors affect residential solar production in Alberta?

The major factors impacting residential solar production is the design of the

roof and shading surrounding the property. South facing roof slopes without obstructions from neighbouring homes or trees will result in the most efficient electricity production. Are there any government incentives or rebates for installing residential solar in Alberta?

.

What is a residential solar calculator?

Homeowners can use this tool as a starting point to help assess their home's solar potential and to get an idea of the estimated costs and payment options. Please keep in mind, the residential solar calculator is intended for informational purposes only and is designed for single-family homes in Calgary.
