Thinking of going solar and want to know how much it will cost to ship those panels in a shipping container?

You're not alone. With renewable energy on the rise, particularly among off-gridders, businesses, and environmentally minded homeowners, solar panel shipping logistics are growing more.

Switzerland-based start-up PWRstation has developed a container-based retractable PV system solution that is claimed to allow a large number of solar panels to be deployed very quickly by a single person. The solution is based on the company's Exorac Tryptic racking technology which can include two.
