

Retractable solar panels EPC service price in Belgium

12V 10AH

Overview

Can you install solar panels on a roof in Belgium?

Installing solar panels on your roof is a (very) cost-effective operation. In Belgium, there are a number of subsidies to help cover the cost of installing solar panels. You can also choose the model of the self-consumption of energy produced by panels, which is also very advantageous.

How do solar panels work in Belgium?

Energy transformation Photovoltaic panels convert solar energy into electricity. Self-consumption and resale : In Belgium, you can consume the electricity you produce and sell the surplus. Service life : Recent models of solar panels last between 25 and 30 years. Subsidies : These facilities benefit from substantial public funding.

How many MWp of solar panels are installed in Belgium?

When we installed the first photovoltaic energy systems, we were pioneers. Today, like solar energy itself, we are an established player. Over the years we have already installed more than 500 MWp of panels, both in Belgium and abroad. In addition, we are responsible for the maintenance of 300 MWp on more than 250 sites in Belgium.

How much subsidy can I get for solar panels in Flanders?

Currently, the maximum amount of subsidies you can receive for the instalment of solar panels in Flanders is €750. In 2024 the maximum subsidy will decrease to €375. The subsidy amount is always limited to 40% of the total investment costs including VAT, as stated on the invoices. What Is The Yield Of Solar Panels In Belgium?

.

How much does a solar panel installation cost?

A complete solar panel installation typically costs an average of 3 000 to 5 700 euros, including installation costs and excluding VAT. The exact cost of your solar panels depends on factors such as the type of installation and the number of panels, while the number of panels you install depends on your energy consumption.

Are solar panels self-consumption a good idea in Belgium?

In Belgium, many people are opting for self-consumption for their solar panels. Here's what it means and what the advantages are: You use the electricity generated by your panels directly. If you produce too much, you can sell the surplus to the electricity grid. The upside of self-consumption :
