

Roof replacement and solar installation

Overview

How much does it cost to replace a roof before solar?

If you have an asphalt roof over 5-10 years old, you'll probably want to replace it before going solar. Replacing your roof and installing solar costs about \$30,000. If you need to replace your roof after you install solar panels, expect solar panel removal and reinstallation to cost anywhere from \$1,500 to \$6,000.

How to replace a roof with solar panels?

The Removal and Reinstallation Process Panel removal: The primary step in replacing a roof that has existing solar panels involves the removal of the panels. This is a delicate task that should be handled by professionals to avoid damage to the panels or the electrical system.

Can you install solar panels on a new roof?

Roofing work: After the panels are safely removed, roofing work can proceed as it would on any roof without solar panels. It's important to ensure that the new roof is compatible with solar panel reinstallation. **Panel reinstallation:** Once the roof work is complete, the solar panels need to be reinstalled.

Should I replace my roof and get solar panels at the same time?

Replacing your roof and getting solar panels at the same time can even provide some benefits. When you install solar panels and a new roof at the same time, it's very unlikely you'll need to re-roof during your system's lifetime. Solar panels are more durable than most roofing materials and can extend the life of the roof shingles they cover.

Can a south-facing roof accommodate solar panels?

South-facing roofs with a slope between 15 and 40 degrees often give the most optimal performance. However, other orientations and slopes can still be suitable, and a solar panel installer can help guide you here. It's essential to

assess if your current roof can efficiently accommodate solar panels or if modifications are necessary.

Why do you need a new roof & solar panel installation?

Streamlined process: Combining roof replacement and solar panel installation into a single project simplifies logistics and reduces overall disruption to the household. Optimal system integration: A new roof ensures proper fitting and sealing of solar panel mounts, reducing the risk of leaks or structural issues.
