# **Savings with solar panels**

## Overview

---

### Do solar panels save money?

Shooting for 100% offset, or slightly more, is common and often provides the greatest energy cost savings. However, solar panels can still save you money by offsetting 50% or 75% of your electricity usage. Another major variable that affects savings is the amount of sun your solar panels get, known as solar irradiance.

### How much will solar panels save you over 25 years?

The average U.S. homeowner will save around \$52,000 over 25 years after installing solar panels, but your savings will vary depending on where you live and the cost of electricity in your area. The table below shows our state-by-state solar savings estimates over 25 years.

### Are solar panels a good investment?

With electricity prices surging, going solar is a no-brainer in terms of saving money. Solar panels save you money by replacing your electricity bill with lower monthly solar payments. Over time the 25-plus year life of a solar system, often adds up to tens or hundreds of thousands of dollars in energy cost savings.

### Can a solar loan save you money?

Solar loans can provide immediate energy cost savings by replacing your electricity bill payments with lower solar loan payments. However, in the long run, the interest reduces how much you can save with solar panels.

### How much can you save on solar energy?

Most solar shoppers save between \$34,000 and \$120,000 on electricity over the lifetime of their solar panel system. However, there's an urgency to act now to maximize savings. Recent federal legislation has eliminated the 30% residential solar tax credit after December 31, 2025—nearly a decade ahead

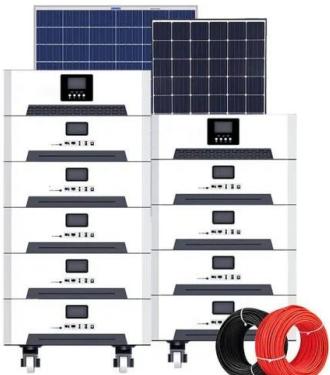

of schedule.

How can I save more money if I go solar?

One way to save more money by going solar is to claim local and federal incentives. Most notably, the federal solar tax credit worth 30% of the total project cost is available to all homeowners and substantially reduces the cost of going solar.
