

# **Selling home with solar panels**

## Overview

---

Can you sell a house with solar panels?

To understand that process, we must first look at four types of solar panel ownership types and how they might affect the process you go through to sell a house. When selling a house with wholly-owned solar panels, a homeowner can sell the house with existing solar panels without transferring or removing them from service.

Are solar panels a boon for selling a house?

Data available for 2021 from Rocket Homes shows that homes with solar panels spent 13.3% less time on the market than homes without solar power. In other words, solar panels could be a boon if you're looking to sell your home quickly. There's a pretty defined timeline for selling a house, and certain steps in the process are going to take longer.

Can solar panels help sell a home faster?

Not only could you sell faster, but owners of homes with solar panels have a decent chance of selling for more. This is particularly true if comparable properties in your area have sold for more because they have solar panels. Solar panels on a home are a shining beacon for a certain type of buyer.

How do you sell solar panels?

For a smooth sale, collect all of your essential documentation (purchase receipts, warranty information, and records showing energy savings). These documents will provide transparency for buyers and help them take over care of the panels seamlessly. When solar panels are leased, the sellers of the home don't own the solar system: The lender does.

Should you buy a home with solar?

One of the main selling points of a home with solar is that if you get a system that's up to par, it should cut your energy costs. It might not sound like much,

but this can make a big difference in many areas where electricity prices are high.

Are solar panels a good investment for a home?

Solar panels on a home are a shining beacon for a certain type of buyer. For example, some buyers want to participate in a clean or green energy movement. Others are going to be interested in saving on utility bills.
